

Advent is an interactive artwork that takes the form of an advent calendar in which the user follows a trail through 25 days in the life of a fictional character. Each day reveals a series of explorable images, animations and texts that illustrate the protagonist's descent into megalomania. Like many recently published computer works, Advent uses gameplay as a way to explore a complex narrative. But unlike many conventional computer games, the work is multi-stranded and poetic in character, with the final resolution simply a coda on the work and not its sole motivation. System requirements: This CD-ROM is compatible with Windows (486 or Pentium chip) and Macintosh (68040, PowerPC or G3/G4). It needs 256 colors and a minimum of 5 mb of memory RAM (although more is better). It does not require QuickTime or any special installation but will play straight from the CD.
