The challenges include the spread of invasive species and the loss of forest components like American chestnut, butternut, and eastern hemlock. The challenges include the effects of a changing climate, worsening fire seasons, and epidemics of forest pests and diseases. A century ago, our main forest-related problem in the United States was deforestation. Today, our forest estate is stable, but we face a host of other issues. Many challenges are associated with drought, wildfire, invasive species, and outbreaks of insects and disease—all made worse by climate change. United States deforestation has caused the destruction of virgin forests by 75% . of exotic hardwoods in western markets has further strained this problem. The world's natural forests are hanging on by a thread. In places like Indonesia, central Africa, and the Amazon, forests are being cleared to make room for. NASF supports the suite of USDA Forest Service State & Private Forestry (S&PF) and other priority programs which help bolster America's economy and.

Stresses on U.S. forests include wildfires, pest invasions and For family forest owners, parcelization and fragmentation are major issues. The U.S. Forest Service, the Bureau of Land Management, and other In the late s, when I first became involved in forest issues and.

Some of America's forests are home to trees or more years old. There is a world deforestation crisis - and America is at the center of the problem. In the United States practically all of the concrete accomplishments in .. ment on the Forest Problem of the United States, 73 Congress, 1 S. Document 12 (serial .
