

“How to Become a Successful Beekeeper!” is for anyone wanting to know more about keeping bees and producing their own honey, or the many other products from a bee hive. Keeping bees is something that has quite a mythos associated with it, you see people covered with bees, wearing strange costumes and stories of people being stung by bees. However, beekeeping is very different from this and thousands upon thousands of people across the world keep bees and produce their own delicious and healthy honey. This book is your step-by-step guide to getting started in the exciting world of keeping your own bees, which almost anyone can do, anywhere in the world! With bees across the world under threat of extinction, keeping bees can help protect these vital pollinators and this book will give you valuable tips and advice so you can set up your own bee hive and keep your own bees. In “How to Become a Successful Beekeeper!” you will discover:

- Bee Strains: Types of Bees – find out about the different types of bees, including which ones are the best for apiary and producing honey
- Beekeeping Tools and Equipment – learn about the tools and equipment you need in order to get started as a beekeeper plus how to determine whether you are allowed to keep bees in your area
- Bee Hives – understand the different types of bee hives and which ones would be suitable for you to use for your bees, including where to locate your bee hive to ensure your bees are happy and safe
- Bee Pastures and Pollination – for your bees to thrive and produce honey they need some vital things nearby; learn what they are and how to ensure you provide them for your bees
- Populating the Hive – Buying Bees – discover how to get the bees for your bee hive, what bees you need to buy and how to ensure they arrive safely to your door
- The Bees in a Colony – find out the different types of bee in your hive, what they do and why they are so important
