

Journal of Consciousness Exploration & Research (JCER, <http://www.jcer.com>) is a publication in which scientists, philosophers and other learned scholars publish their research results and express their views on the nature, origin and mechanism of consciousness. In doing so, we hope that one day we will be able to arrive at a genuine science of consciousness. This is JCER Volume 2 Issue 9 first published in November 2011. It is entitled Existential Mechanics, Holographic Approaches & Self-transcendence and contains following Articles: (1) Introduction to Existential Mechanics: How the Relations of Existence to Itself Create the Structure of Reality and What We Experience as Reality; (2) Existential Mechanics Part I: The Three Progressive Levels of Reality and Experience; (3) Existential Mechanics Part II: The Big Picture; The Relation Between the Structure of Reality and What We Experience as Reality; (4) Existential Mechanics Part III: The Creation of Experience by the Individual; (5) Holographic Trans-disciplinary Framework of Consciousness: An Integrative Perspective; (6) Cells, Neurons, and Qualia: The Holographic Strange Attractor Model; and (7) Transcending the Shamed Self.
