

This book has been specifically written for grade 2 children aged 7 to 8. The planet Mars, Earth's neighbor, has intriguing similarities and differences to Earth. In this book, you will discover our neighbor, in all its glory. The Red Planet, Mars, has inspired wild flights of imagination over the centuries. Whether fancied to be the source of hostile invaders of Earth, the home of a dying civilization, or a rough-and-tumble mining colony of the future, Mars has been the subject of scientific observations for centuries. This book will teach you interesting facts about Mars, including: 1) Where Mars got its name from. 2) That Mars has polar ice caps, like those in the Arctic regions on Earth. 3) That Mars has deserts similar to Death Valley. 4) That Mars has craters that were once volcanoes like the ones on Hawaii, including the largest volcano found in the entire solar system. So get ready to discover all the mysteries of Mars, in an entertaining, easy read picture book format.

Political representation and elections; parties and voting in Great Britain (Studies in political science.
