

Excerpt from Socialism and Character Here on this holy Tuscan mountain sanctified by the Passion of St. Francis, where brown-robed brothers move about in an exceeding peace among their peasant-friends and white sheep-flocks, the rumor of the modern struggle sounds from very far away. Yet since the first pages of this book were written, the phenomenon it signals, as you and I are aware, has become more and more evident. Socialism is now making itself felt in every Anglo-Saxon country, not merely as an academic theory, but as a political force. Associations enlisting the joint support of high finance and high ideals are formed against it; local victories, in the United States, increase with each election. Shall this socialism remain purely political? Or shall its rich moral possibilities be fostered and utilized? Shall it be allowed to develop mainly as a negative movement of revolt from an intolerable situation, or should men rather stress in it the constructive elements related less to the attainment of material decencies than to the upbuilding of character? These are the questions we have wanted to help people to think out, - having first in much perplexity thought them out for ourselves.
