

In the 20th century, more than ever before, the world is being shaped by science. Science has an intrinsic value in trying to find out how the world ticks, and it has an enormous and increasingly social value too. The scientific enterprise of today provides the information for the society of tomorrow. Scientists have become leading actors in world history. The discipline of curiosity, as science may be called, is not just a discipline of form, it is also a discipline of ends: political, moral, cultural and commercial ends. Science and technology have become features of daily life. In this book of interviews, fifteen opinion leaders (prominent figures from international politics, business, communication and science) give their vision on the changing role of science in society. They all agree that scientific information is essential, not just for the scientist. For with the recognition of its crucial importance comes the understanding that the scientific enterprise is, or should be, a concern to everybody. The scientist is a central figure and has to communicate with politicians, entrepreneurs and the public at large.

What Day Is It? (Green Light Readers Level 1), Towards universal social protection: Latin American pathways and policy tools, Character Through Religious Control, The Vampire Hunter Chronicle One Family One, Easton Press Price Guide - Signed Modern Classics (Easton Press Price Guides Book 1), Morningstar Stocks 500, Religion (Tudors & Stuarts), The Tragedy of Pompey the Great,
