

Over the course of the last fifty years, research has shown that the ability of the fetus to feel, experience, and perceive is much greater than had previously been supposed, yet debate continues concerning sensations of fear, aggression, and relating the self to the environment of the womb. Using theoretical and clinical material, Philippe Ploye summarizes previous work on the significance of prenatal behavior in psychotherapy and expands on this body of work to provide an informative and constructive account of the ways in which life before birth can both foreshadow problems experienced in postnatal life and can mirror the close, dependent nature of the relationship between patient and analyst established in a psychotherapeutic context. Ploye's text reveals a continuity of experience from prenatal stages to adulthood and will appeal to all psychotherapists interested in the development of human behavior from conception onwards and the implications of this for the concept of the self.

Truth Awaits You on the Other Side: An Anthology about the Consequences of Sin, Gerencia exitosa de ventas (Spanish Edition), Continental Crucible: Big Business, Workers and Unions in the Transformation of North America, The Age of Persuasion: How Marketing Ate Our Culture, Petrol Price Asymmetries Revisited (Surrey Energy Economics Discussion Papers), Crisis of the European Subject (Cultural Studies), Wiley and the Hairy Man, Case Studies for the Emergency Responder: Psychosocial, Ethical and Leadership Dimensions,
